

**Session II: «Closing the skills gap to succeed in the digital tourism economy»**

«Digitalization is a must for our employees,  
trust is key»

Niesen, 2'363 m above sea level

Urs Wohler, CEO, [urs.wohler@niesen.ch](mailto:urs.wohler@niesen.ch)  
Mülönen, January 28, 2020

**NIESEN**

- A simple and understandable product to a fair price

Mountain

+

Funicular

+

Restaurant

Emotions:  
«that's where I want  
to go to»

Reliability and  
tradition: 120 years  
of history

Hotel from 1856: Stay  
overnight, enjoy, dream,  
come back

- Guests from the Bernese Oberland, from the greater Berne area and from the other parts of Switzerland

Digitalization is a (the) condition in order to fulfill the future development

How we do we do that? How do we fill the gap(s)?  
Training is not enough.

- We have to carefully select and introduce our employees
- ...to take care of them
- ...explain to them what we do
- ...empower / enable them in new things and skills
- ...take them for serious
- Adjust education at their speed

➔ Intensifying Leadership

➔ Trust them

➔ Needless to say: Also demand performance from employees

But: **Trust** is «the key»

Top of Niesen, 2'363 m

1. Despite digitalization, we must never forget that the aim is to dialogue with the customer
2. Trust is the key to train employees who do not have all the skills
3. Without digitalization customer dialogue is no longer possible along the customer journey
